

700 craft and staff
1.8M+ work-hours annually

30+ years on site
680k+ work-hours annually

Proudly and safely
 maintaining our clients'
 mission-critical assets.

Multi-site Gulf Coast chemicals client

Scope

Complete program management for ongoing mechanical maintenance, turnarounds and shutdowns, and small capital project work. We direct-hire hard craft trades, for concrete, mechanical and electrical scopes. Our self-perform work includes:

- Pressure vessels
- Process piping
- Structural and on-site tank fabrication and modification

Key Achievement

Since inception in July 2010, our safety program, direct-hire capabilities and processes, reduced safety incidents and labor costs by 20%+.

Multi-national chemical company, U.S. & Canada sites

Scope

Multi-site execution of maintenance, capital projects, turnarounds and construction support. We are integrated into the facility, serving as part of the site leadership team and interfacing with management at every level. Our full mechanical scope has included:

- Pressure vessels
- Process piping
- Electrical
- Structural
- Rope access

Key Achievement

The implementation of a rigorous training program that allows for tracking and developing site specific training needs to enable increased quality and productivity.

Thank you for the hard work and dedication you showed in developing and managing the schedule for the LHC-2 turnaround. Your effort and teamwork were a significant contribution in making this turnaround a success.

– Client Maintenance Manager

OVERVIEW

With decades of refinery, petrochemical, fertilizer and power plant experience, CAM Industrial Solutions is raising the standard in industrial maintenance, turnaround and operational services across North America.

Our capabilities range from facility operations, program management, scheduling and planning, to scoping and self-performing field construction. We partner with our clients to deliver exceptional value through multi-disciplinary, direct-hire, general mechanical and E&I services that result in increased asset reliability and industry leading safety performance.

MAINTENANCE AND SMALL CAPITAL CAPABILITIES

- ASME vessels / columns
- Mechanical services
- Process piping & valves
- API tank repairs & modifications
- Furnaces & boilers
- Exchanger & self-perform bundle pulling
- Rope access
- E&I
- Structural
- Specialty welding
- Rail loading
- Scheduling & planning
- Scoping & constructibility
- Small capital construction management
- Estimating
- Procurement
- Inspection
- Fabrication
- Site transitioning
- Turnaround planning & execution
- Safety management
- Power O&M

13M+

incident rate (TRIR)

SAFETY

CAM promotes a culture of safety and accountability through behavioral training, incentives and comprehensive operating procedures. Our efforts have led to recordable injury-free performance at multiple North American site teams in both continuous maintenance and turnaround categories.

WORKFORCE CREATION AND DEVELOPMENT

Our CAM Academy allows us to recruit, develop and sponsor promising talent, while cultivating craft expertise. Beyond skill acquisition, CAM Academy is building leaders of tomorrow by emphasizing a culture of learning and professional growth.

TECHNOLOGY

Based on CAM and client best practices, our CAM CORE ANALYTICS suite is a secure cloud-based mobile platform collecting critical field data to support real-time reporting, analysis and decision-making for site management. Multiple modules include tracking work delays, managing tools, updating schedules, conducting safety observations and reporting safety events. Modules may be deployed independently or bundled together to provide comprehensive reporting across all functions.
