

**THESE ARE  
THE ONLY HOLES  
YOU'LL FIND IN OUR  
HEAT EXCHANGER  
SERVICE**

**TOTAL EXCHANGER  
MANAGEMENT**

# TOTAL EXCHANGER MANAGEMENT. **NO HOLES.** FROM HPC.

By choosing HPC Industrial to handle the cleaning, repairs and maintenance for your heat exchangers, you're choosing the experts from North America's largest Industrial Services company. From blind to blind, we will handle every last detail ensuring the safety, sustainability and efficiency of your facility.

## **BUNDLE EXTRACTION**

Our cross-trained bolting specialists are ready to blind and disassemble the exchanger bundle using our extensive supply of hydraulic tensioners and torque wrenches. Removing the bundle from its shell and transporting it to a wash pad is easier than ever with our equipment.

## **CLEANING THE EXCHANGER**

HPC has the expertise and technology to clean your facility's exchangers onsite or offsite with our innovative ShellSide cleaner, our Computerized Tube Cleaning System (CTCS) and other tube cleaning methods like IBC and ATL, and our Ultrasonic Chemical Cleaning capabilities. Our proprietary chemistries help maintain and protect the metallurgy as they clean, meaning an extended life for your exchangers.

## **TESTING AND REPAIR**

We have ASNT level III and level II technicians and access to the necessary material resources to provide several methods of examination, inspection and repair for your facility's exchangers. Any repairs needed, like retubing, tube plugging, machining/milling and more, can be handled onsite by our experts as soon as they're identified.

## **EXCHANGER REINSTALL**

Reincorporating the freshly cleaned exchanger takes no time at all with our specialized equipment and hydraulic tools. With a leak-free startup, your facility will be back up and running smoothly as soon as the final blind is removed.

**FROM THE ONLY EXCHANGER SERVICE COMPANY YOU'LL EVER NEED.**
